TX 78768
USA

Dear Sir or Madam,

I am writing to lodge a formal complaint with you regarding your past and present treatment of William J Rea M.D. Please copy this letter to each of your board members and submit this complaint to your full complaints procedure at your very earliest convenience.

It is my understanding that evidence supporting William Rea M.D. was submitted to you by 17 of Dr Rea's peers yet you chose to ignore that evidence in favour of the negative findings of one single unqualified and anonymous reviewer. I further understand that, on the basis of that solitary negative review – and certain initiating “anonymous complaints” - you have somehow seen fit to recommend that Dr Rea's licence to practice medicine be revoked.

Such covert and unjust procedures - and the scandalous recommendation you have issued on the back of them - are, I believe, completely unjustifiable. Frankly, such ridiculous and shameful behaviour from a medical board is, in my view (and that of many of my colleagues) quite simply unacceptable. Consequently, I ask you, for the sake of your national and international reputation as a medical board, and for the sake of the perceived integrity of your individual board members in the eyes of the public, to drop all further action against Dr Rea and rescind your ill advised “recommendation” with regard to him immediately.

Please acknowledge safe receipt of this formal complaint and advise regarding your future intentions in this matter at your earliest convenience. Thank you.

Towards a toxin free future...

Gordon D McHendry
