Subject: Regarding Gillian McCarthy

Dear Dr. Patrick,

Regarding Gillian McCarthy:

The Stopgap is and has been the only place Gillian can safely stay away from all manner of man-made chemicals to which she has become extremely sensitive. In her present condition, any exposure is likely to cause her very grave health problems. This is her only sanctuary and she cannot safely be transported elsewhere. Gillian needs specialist housing and home care, not hospitalisation which is likely to cause Gillian extreme suffering and an untimely death. Her condition of Multiple Chemical Sensitivity is chronic and must be taken seriously.

I trust you will urge Somerset PCT to consult further with Gillian and her family and respect their wishes.

Many thanks,

Andy Croft, concerned friend
